IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

16 JAN 1911

Kept at Beckenham
in the County of Kent 5
by J. A. Angell. Surveyor. Beckenham U. D. Council

RAIN GAUGE
Pattern Glaisher. Stanley
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 110 ft.

Time of Observation 9 am

Nearest Railway Station
Name Beckenham Junc N.N.E Clock House N.W.
Distance 1000 yds each

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.
5 JAN 1911

RE [redacted] 910

Kept at Becky Lees

in the County of Kent 5

by R Edwards

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 480 ft.

Time of Observation 8.30. A.M.

Nearest Railway Station
Name Otford
Distance 3/4 Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 26 JAN 1911

Kept at Bicknor Rectory

in the County of E Kent 3

by Rev W. T. Martin

RAIN GAUGE Pattern
Diameter of top ______ in.
Height of top above Ground ______ ft. ______ in.
" " " Sea Level ______ ft.

Time of Observation ______

Nearest Railway Station Name ______
Distance ______ Direction ______

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at St Peter's
in the County of Kent 2
by H. C. V. Snowden.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground — ft. 9 in.
" " " Sea Level 140 ft.
Time of Observation 8. 30 a.m.
Nearest Railway Station
Name Broadstairs
Distance ½ mile Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

EX

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
7 JAN 1911

Kept at Providence House. Broadstairs

in the County of Kent 2

by Cecil Hamersley

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. in.
" " " Sea Level 50 ft. I

Time of Observation 9·30

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 MAR 1911

Kept at Bromley, The Palace

5

in the County of Kent

by Coles Child F. C. Bayard

RAIN GAUGE Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 187 ft.

Time of Observation

Nearest Railway Station Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Exd Rmg

FORM A2. BRITISH RAINFALL.
4 JAN 1910
298

Kept at Irrigation Farm Canterbury
in the County of Kent
by Chas Terrys

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. 6 in.
" " " Sea Level 15.00 ft.

Time of Observation 9 am

Nearest Railway Station
Name Sturry
Distance 1 mile Direction N. E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

WS/TR.

9th September, 1911.

Dr. H. R. Mill,
62, Camden Square,
LONDON, E.C.

Dear Sir,

We regret to say that there has been an error in giving you the height of our Charing Rainfall Station.

This should be 473od instead of 593 as given in your British Rainfall for 1910. We shall be glad if you will kindly correct this, and with apologies for the error, we are.

Yours truly,

For The MID KENT WATER COY.

F. L. Ball

~~Secy. & Manager.~~

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

18 MAR 1911

Kept at Charing Pumping Station

in the County of Kent 2

by The Mid Kent Water Company

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level ~~593~~ ft. 473

Time of Observation 9. a.m.

Nearest Railway Station
Name Charing (S. E & C R.)
Distance ¼ mile Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at **9 a.m.**, and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

22 MAR 1911

Kept at Combe Bank, Sundridge

in the County of Kent 5

by Robert Mond Esq

RAIN GAUGE
Pattern Negretti Zambra
Diameter of top 8" in.
Height of top above Ground ft. 10 in.
" " " Sea Level 323 ft.

Time of Observation 9 am

Nearest Railway Station
Name Brasted
Distance 1½ m Direction W.S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1908

FORM A.
BRITISH RAINFALL.

14 JUL 1909

Kept at Camden Lodge Cranbrook
in the County of Kent
by A Habbitts

RAIN GAUGE
Pattern Round
Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 276 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Cranbrook
Distance 3m Direction S. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

4 FEB 1911

REGISTER OF RAINFALL IN 1910

Kept at Downe Council School

in the County of Kent 5

by Arthur J Ridge

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 500 ft.

Time of Observation 9-a.m.

Nearest Railway Station
Name Orpington
Distance 3½ m Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

10 JAN 1911

Kept at Broadwater, East Malling

in the County of Kent 4

by Chas. Mercer.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 166 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Malling
Distance 1 mile Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

5 JAN 191

Kept at Edenbridge Exd Rmf

in the County of Kent

by James L Boyson

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 160 ft.

Time of Observation 7.30 a.m

Nearest Railway Station
Name Edenbridge Town. L.B.&S.C
Distance 250 ft Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Ex DL

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at "Cluny" Edenbridge

in the County of Kent 4

by James L Boyson

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 160 ft.

Time of Observation 6.30 to 7.30 a.m.

Nearest Railway Station
Name Edenbridge Town
Distance 3/4 mile Direction E S E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.

BRITISH RAINFALL
3 JAN 1910

REGISTER OF RAINFALL IN 1909.

Kept at Cherry Gardens Folkestone

in the County of Kent

by Henry Turner.

Rain Gauge:
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 230 ft.

Time of Observation 9. a. m

Nearest Railway Station: Name Shorncliffe
Distance 1½ Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Cherry Gardens, Folkestone

in the County of Kent

by Henry Turner

RAIN GAUGE
Pattern Symons
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 230 ft.

Time of Observation 9. A.M

Nearest Railway Station
Name Shorncliffe
Distance 1½ Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

30 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Radnor Park Folkestone

in the County of Kent

by A. E. Nichols

RAIN GAUGE	Pattern N-Z Self recording
	Diameter of top 8 in.
	Height of top above Ground 5·89 ft. in.
	" " " Sea Level 127 ft.

Time of Observation 9 a.m.

Nearest Railway Station	Name Central S.E.&C.R.
	Distance 220 yds Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 9 JAN 1911

Kept at Sanatorium, Folkestone

in the County of Kent

by E. G. George Bateman

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground ft. 11 in.
" " " Sea Level 102 ft.

Time of Observation 9 am

Nearest Railway Station
Name Junction
Distance 500 yds Direction W.N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
